

RAJASTHAN STATE INDUSTRIAL DEVELOPMENT & INVESTMENT CORPORATION
LTD. UDYOG BHAWAN, TILAK MARG, JAIPUR-302005.

No. ACE/Tech./2011-1326
Date: 18 August, 2011

OFFICE ORDER

The State Govt. has recently formulated State Water Policy 2010. One of the important objective of this policy is to save ground water and surface water from contamination. In this context, it is enjoined upon all unit heads that disposal of contaminated effluent generated by industrial units in the storm water drains should be forbidden. The discharge of contaminated effluent either ground water or surface drainage should not be permitted in any case.

In case if any industrial unit is found to be violating the above instructions, the action against the concerned allottee should be taken in accordance of the terms & conditions of the allotment at unit office level. The list of such allottees violating the above provisions should be intimated to the Rajasthan State Pollution Control Board for taking necessary action as per rules.
