1.2 General:

In the eastern part of rajasthan state spreading over in the area of about 3034 sq. Kms. This district is formed on 15.04.1982

1.3 Geographical Area:

Dholpur district formed 15 april 1982, dholpur (district) of rajasthan carved out of bharatpur district. This extends *latitude* of 26°42'9.07" North latitude and a *longitude* of 77°53'36.21"East longitude. It is bounded on the north east by agra district of utar pradesh. On the south by morena (m.p.) district and on the north of bharatpur district and on the west of karoli. The total area of dholpur is 3034 sq. Kms. Village Silawat (Rajakhera) is the most eastern village of rajasthan.

1.4 Land Use Pattern in The District:

The total reporting areas in dholpur district was recoded at 300913 hectares. The classification of the land use in the district was found as given under-:

land use pattern as on 31.3.2018

S. No.	Description	Area in hac
1.	Total reporting area	300913
2.	Area reporting forest	27184
3.	Not available for cultivation	92582
4.	Cultivated waste	24406
5.	Fellow land	-
6.	Net area shown	156741
	(1) Irrigation	124185
	(2) Non irrigation	32556

Source : distt. Collectorate , dholpur (raj.)

1.5 Physiographic:

Range of sand stone hills runs from dholpur town in a south western direction attaining at one place on attitude of 356.91 meters above sea level. The land in dholpur district is fertile and rises from alluvial plain near the level. Hills and broken grounds characterize almost the whole territory, along the velly of the chambal as irregular and lofty wall of rocks separate. The land on the river from the uplands.

1.6 Administrative Set Up:

For smooth functioning of administration the district has been divided into six sub-division, six tehsils and five panchyat samitties. Details are given in the table 1.1 there are three municipalities in the district. There are three town and 826 revenue village in the district. Unhabited village are sixteen.

1.7 Climate And Rainfall:

The climate of dholpur district is generally dry. Dholpur town is one of the hottest place in the rajasthan state with maximum temperature rising up to 50dc

and the minimum upto 4dc. The average annual rain fall in the district is about 67cm. While in the year 2008 it was recorded at 110cm.

1.8 Forest, Flora And Fauna:

During the year 1990-2000, 6.93% of the separating area of dholpur district was covered under forest . The main species are dhok or dhao. The other trees are arung, dhak, kachnar, babul etc.

The district also possesses two sanctuaries viz, van vihar and ram sagar which are situated at a distance of about 18 kms from dholpur city. The animals found in the area are jackal, deer, chinkaras, and sambhar, bear etc. Indian skimmer found in the Chambal river bank is declared as the district bird by forest department.

2.1 Human Resources:

Population:

Human resources are the basic input for maintaining the existing and future industrial development of an area. As per population census 2011 the total population of the dholpur district is about 1206516 out of this 653647 were male and remaining 552869 were female. The population density (as per 2011 census) in the district is 398 per. Sq. Km., as compared to 324 in 2001 and sex ratio in the district is recorded as 846 females over each one thousand males.

Literacy:

As per estimates census 2011 the district has registered the literacy rate of 69.08% . The literacy rate among the male population is registered at 81.22% where as for female it is recorded at 54.67% only.

Rural and urban population:

As per census 2011 the total population of dholpur district 12.06 lacs of which 9.59 lacs i.e. 82.08 % was recorded as rural population while the balance 2.47 lacs i.e. 17.92 % was the population residing in the urban areas.

2.2 Working Force And Occupational Pattern:

As per census 2011 the total working force in the district is estimated at 66.35 lacs representing 54.99% of total population . The occupational working force is given as follows:-

Working force and occupational pattern as on 31.3.2011

S.no.	Occupational category	No.	Percent (%)
1.	Cultivators	229936	19.05

Natural Resources:

2.3 Water And Irrigation Resources:

The availability of water and irrigation in dholpur district can be divided into the following heads.

- (A) important rivers/ lakes- In the southeastern part of the district one perennial river named as the chambal is located. The second important river is parvati, which has a angai dam of irrigation purpose at a

distance of 25 km from bari. Talabshahi lake & ram sagar dam are also located in the district. Dam's capacity is given below:

s.no.	Name of dam	Capacity (Mcft.)	Irrigation area in hect. (CCA)
1	Parvati dam	4269.50	24667.00
2	Ramsagar dam	1088.75	5600.29
3	Urmila sagar dam	572.80	2900.00
4	Talab-e-sahi	100.65	410.00
5	Husenpur dam	40.00	323.89
6	Umreh dam	75.00	323.89
7	R.T. dam	25.00	323.89
	Total	6171.70	34548.94
8	18 other small dam	622.00	1998.97
	Grand total	6793.70	36547.91

Source: irrigation facilities as on 31.03.2018

(B) Other irrigation facilities- as there is only one perennial river in the district, the main sources of irrigation in the district are tube well/ wells canals etc. source wise irrigation facilities available in the district are given below:

S.no.	source	Irrigation (in hec.)
1.	Canals	36547.91
2.	Tanks (talab)	165
3.	Tube wells	108531
4.	Other	8856
	Total	154099.91

Source: dist. Collectorate, dholpur (raj.)

In case of the overall irrigation facilities extended in the district is taken into consideration it is found that during the year 2017-18 net irrigation area to the sown area was estimated 75.50%.

Drinking water:

The water supply in the district is being performed by PHED dholpur. The major supply of water by PHED is being done from two sources viz, only perennial river chamble and through wells. There are also about 39 scheme of PHED for the supply of water in rural and remote areas of district. It is reported that the availability of water in the district has generally remained satisfactory except in the year adverse mansoon. Drinking water supply of city area given below:

s.no.	Name of scheme	Population	Water production by daily source (lacs ltr)	Water supply per capita (L/p/pd)

5.	Horse & ponies	622
6.	Mules	777
7.	Camel	304
8.	Pigs	7141
9.	Poultry (total)	2177
10.	Cows	59686

Source: dist. Animal husbandry office, dholpur (raj.)

4.1.1 & 4.1.2 Veterinary Centre & Hospitals-

It is also important to mention here that district has developed adequate number of veterinary hospitals dispensaries etc. Presently 38 veterinary hospitals, 5

dispensaries and 56 number of artificial insemination Centre are available in the district, besides one diognometric lab, one pathology lab, and 3 Mobile units.

5. Products of Animal Husbandary:

5.1 Availability Of Dairy Products-

5.1.1 Milk:

The livestock population in the district is major. However breed of cows and buffaloes is fairly good. In the district average milk production is 6 lac liters per day.

5.2 Wool Availability:

Sheep are reared in the district mainly for wool and meat. As per data available from integrated sample survey report for estimation of major livestock based products. Each sheep yields approximately 1.34 kg. Wool every year. Thus there is the potentiality for only 15.00 tons of wool within the district per year.

5.3 Meat Availability:

Assuring on an average slaughter rate of 20% for both sheep and goats death rate of the same as 0.30% and 9.20% respectively and the meat availability of 8.167kg and 9.274 kg per sheep and goats, the total availability of meat per annum in the district is estimated at approximately 210.5 tones.

5.4 Leather Availability:

The district has a sufficient cattle population. The discussion with the district official reveal that the morality rate could safely be assumed to be 10% and availability of 25 sq. Ft. Of hide per animal which may contribute about 8 lac sq. Ft. of hide in each year duration.

5.5 Bones:

As per the report "bones and binomial in India", the availability of bones per animal can safely be assumed at 12 kg. On this basis the availability of bones in dholpur district estimated at ground 536 tons per annum.

6. Geology & Minerals

6.1 Mines:

There are 225 mines are located in the district.

6.2 Minerals:

The district does not have an important place in the state for the availability point of view of mineral resources the details of major mineral resources found in the district are as given under :-

production of mineral (in tonnes)

S.no.	Mineral	2015-16	2016-17
1.	Sand stone	233994	10956
2.	Masonry stones	113896	44158
3.	Brick earth	80 permit issued	60 permit issued

Source: mines engineer dholpur march – 2018

7. Forest resources:

7.1 Areas: Total forest area of district is 27184 sq. hectare.

7.2 Resources:

Important forest produce available in dholpur district are grass, dhonk (used as a fuel in rural area for cooking food) tendu patta, gum and kattha. As such no major product is available in sizable quantity for industrial purpose.

8. Tourism:

8.1 The dholpur district has a number of religious, historical and archaeological Places Of Importance In India Tourist's Interest. Such Places Are Like Shergarh Fort, Dholpur Palace, Chopra Shiv Mandir, The Chambal Ghadiyal Century, Chambal Revine, Machkund, Kesar Bagh, Babar Bagh, Ghantaghar And Talabshahi apart of one famous sanctuary at 25 km from dholpur. The tourists visiting from both within the country and foreign. Damoh Waterfall is the emerging tourist place in rainy season near Sarmathura.

CHAPTER III Existing Infrastructural Facilities

Infrastructure facilities like power, communication, banking, education, health etc. Play a vital role in the promotion and development of industries in any area a brief account of such facilities available in dholpur district is being given in the following paragraphs.

9.1 Power Resources

The existing power position of the district is just sufficient presently the district is receiving the supply of power from Bharatpur and Hindon by way of transmission.

Electricity Generation- Dholpur Combind Cycle Power Project has started electricity generation with capacity 330 MW(110x3) the power supply position in the district is sufficient.

10. Transport:

Dholpur district of rajasthan state is also attached with u.p. & m.p. state. All the town of the district is well connected with state highways or pakka road. The dholpur town is self-located at NH-03. NH-11B & NH-23 pass through the district. total road in the district is as given under:

10.1 Road Network (as on march, 31.03.2018)

S.no.	Category	Length (in kms)
1.	National highways	138.50
2.	State highways	105.20
3.	Other pakka road	1820.80
4.	CC road	210.93
5.	M.D.R	71.00

Source: distt. Statistical office, dholpur (raj.)

(A) Total number of vehicles registered with district transport office up to march, 2018 the category wise registration of major vehicles in the district may be seen as given under:-

Vehicle On Road

S.no.	Category	Number
1.	Trucks	13533
2.	Buses	2174
3.	Light motor vehicles	8639
4.	Two/ three wheelers	106373
5.	Tractor/trolleys	17167
6.	Other	325
Total		148211

Source: dist. Transport office, dholpur (raj.)

10.2 Rail Transport

Dholpur district is well connected with both narrow – gauge and broad – gauge. Rail routes with north- central railway agra mandal (allahabad zone). The total length in the district is 115 km.

11. Financial institution:

11.1 Banking Facilities:

As on 31st march 2018 there were about 68 branches of bank in this district which include commercial bank of banking facilities in dholpur district has remained is given below:-

Network on banking facility dholpur district (as on 31 march 2018)

S.no.	Bank / financial institution	No. Branches
1.	Commercial banks

	TOTAL		1321	717	604

Proposed industrial area by riico ltd. Dholpur are:-

1. Surajpura-bhilagawa, industrial area, dholpur(71.20 hec).
2. Sanora, industrial area bari, dholpur (54.64 hec).
3. Kotra, industrial area baseri, dholpur(242.34 hec).

12.2 Private:

There is no private industrial area located in the district.

13.1 Existing Industrial Scenario:

Dholpur district is an industrially backward district, formally it was a part of bhartpur and at that time is could not draw much attention as regard to industrial development of the area. As regard to resources the district does not possess any major resources in abundance built on the other hand the infrastructure facilities seems to the level of satisfaction in the area. 17 September is declared as a MSME DAY by Govt. of Rajasthan. It is celebrated every year at state & district level.

13.2 Existing Industrial Status:**Large and medium scale-industries:**

At present there are thirteen industrial units which come under this specified category. (In crore)

S. No	Name of enterprises	Products	Invest.	Emp.
1	M/s Rajasthan explosive & chemicals ltd.	Detonators & detonating fuse	32	513

6.	Chemical based	55	510	2352.00
7.	Engineering based	198	1204	2575.63
8.	Other	979	3477	6161.41
total		3063	16028	41523.92

Would also be of worth to mention here that the development of cottage village land artisan units also have an important place in the development plans of the state as well as of the center. Such units have been getting inputs through incentives mainly in the form of subsidies from both the government via, central and state and loans on some liberal terms from the institutions like KVIC, RFC and under various schemes of NABARD and SIDBI.

13.3 export potential items:The significant items of district are skimmed milk powder, stone tiles and slab having the export potentials.

14.1 Potential Industries and Other Contributory Factors:

As already mentioned the, dholpur district is considered to be one amongst the industrial backward district of the state. As regard to the availability of infrastructure facilities the district possess adequate facilities for the development of the industrial sectors but if the availability of resources is taken in to consideration the district is found lacking behind in this particulars aspect. Still taking in consideration the strength of the district set up few industries are being identified having good potential

14.2 Resources;

The in time resources available in dholpur district related in the industria development have already discussed in chapter ii of this report. The analysis of available resources reveals that the district does not have the sufficient concentration of important mineral resources. Bajra, wheat and barley are the main crop product of dholpur. The district has livestock population of 5.91 lacs consisting of 0.61 lacs cattle, 3.59 laces buffaloes and 0.89 lacs goats mils is in available in the district in substantial quantity , beside milk the hide and bones etc. Are also available in the district in sufficient quantity which maybe of good industrial potential.

14.3 Infrastructure:

The infra- structure such as power, rail and road network communication etc. Is adequate to counter to the present level of industrialization keeping in view the demand of industrial plots in dholpur sub- division growth center has development with 1321 industrial plots. However other social amenities like education, medical & health facilities network of banks and other financial institution etc are just sufficient.

14.4 Strategies Suggested:

To accelerate the rate of industrial growth in the district it is essential firstly to give stress to the development and expansion of existing industrial areas along with processing new industrial areas and location which have right prospects for coming up of new industrial units and secondly to suggest the package of viable and feasible new industrial ventures which have good prospects in the district.

14.5 Potential Industries/Agro Based:

The list potential industrial ventures based on the available resources of demand ofthe local as well as neighboring districts people the under suggested strategy is drawn after detailed discussion with district existing industrialists and trade association apart of consulting other related local offices in dholpur district. The details of such potential industrial units are as given under:-

List of potential industrial in dholpur district

Suggested units	Capacity	Investment (rs. In lacs)	Employment	No. Of unit	Suggested Location
(A) Large/ miduim scale industris					
Sand lime brick	10 millions	200.00	1500	10	Dholpur

Plastic containers	30 mt	5.00	5	1	Dholpur
Pvc products	72000 no.	7.50	1	-	Dholpur

Foot loose industries:

These industries are market oriented and do not generally depend upon resources available locally and in the surrounding nearby areas. Rather the setting up of industries mainly depend upon the individuals choice and convenience. Dholpur district being connected with good roads and railway routes (both narrow gauge as well as broad gauge) can be the good location. For setting up a few such industries in its township. Semi urban areas as well as rural areas .a list of such suggested footloose industries are as under:-

Potential foot- loose industries in dholpur district

14.6 Proposed augmentation of industrial area:

Proposed expansion

Keeping in view the heavy demand for industrial plots and number of plots already allotted in both the industrial area located at dholpur. It is proposed hereby to further expand the following industrial areas.

Samathura industrial area:

Besides this area due to heavy demand of dholpur stone, three more industrial areas at sarmathura could be development as stone quarries are locally available.

Proposed new industrial areas:

A part of the proposed expansions of the above state two industrial areas at dholpur it is also proposed to develop one more industrial area at national highway no- 3 location. This additional industrial area in being suggested for two reasons.

(1) There is no other suitable location except dholpur in the district for augmentation of the industrial development and.

(2) as dholpur city is also well connected with other commercial and trading cities of u.p. and m.p. like agra and gwalior and entrepreneurs from these areas can be attracted for setting up their own venture locations and secondly if the

package of some extra incentive (as compared to gwalior and agra) may be given to them.

14.7 Strategy For Artisans/Handloom Weavers Upgradation:

In the state of rajasthan dholpur district has some tradition of handicrafts in different avenue, the two major among them are manufacturing of aratari, Embroidery, In dholpur shoe making is being done by artisans of sagar para, mohalla and old city, dholpur.

14.8 export from district:

The significant items of district are skimmed milk powder, stone tiles and slab having the export potentials.

14.9 Suggestion:

It is proposed to organized few skill and technology upgradation programs (STUP) by industrial development bank india, Ruda, simultaneously few skill development short term training programs of micro, small & medium enterprises development institutes (MSME) would also remain beneficial for the existing artisans for handicraft trade, these proposed programs will certainly benefit the artisans by way of enhancement in their skills as well as the quality of the products manufactured by them.

Handloom:

16.3 There is no any organized handicraft unit established in district.

16.4 Main handicraft & features of district are-

Historical background-

In ancient times aaradari work and stone carving work was famous in dholpur. During mughal era aaradari work were used by women to design clothes. Stone carving were used to make historical building.

Stone carving-

An activity where pieces of rough natural [stone](#) are shaped by the controlled removal of stone. Owing to the permanence of the material, stone work has survived which was created during our [prehistory](#). Work carried out to create jail, gamle, poles, mehrab, lamps, stone fountains. The process of removing stone from the earth is called [mining](#) or [quarrying](#). Stone carving is one of the processes which may be used by an [artist](#) when creating a [sculpture](#). The term also refers to the activity of [masons](#) in dressing stone blocks for use in [architecture](#), [building](#). In ancient time it is used to make palace.

Handicraft work

Stone carving work, maharaj bagh, bari

Stone carving work, maharaj bagh, bari

Stone carving work, maharaj bagh, bari

Stone carving work, maharaj bagh, bari

Aaratari- Aari work involves a hook, plied from the top but fed by silk thread from below with the material spread out on a frame. This movement creates loops, and repeats of these lead to a line of chain stitches. The fabric is stretched on a frame and stitching is done with a long needle ending with a hook such as a crewel, tambour (a needle similar to a very fine crochet hook but with a sharp point)^[31] or Luneville work. The other hand feeds the thread from the underside, and the hook brings it up, making a chainstitch, but it is much quicker than chainstitch done in the usual way: looks like machine-made and can also be embellished with sequins and beads - which are kept on the right side, and the needle goes inside their holes before plunging below, thus securing them to the fabric.

Aaratari work, madina colony, dholpur

16.5 There is no handicraft artisan awarded with padam award, shilpguru, nation award, national merit, state level & state level merit award.

16.6 There is no any handicraft agency.

16.7 There is no any handicraft cluster.

16.8 Number of artisan cards issued: 479

All artisans of district are registered on handmade in Rajasthan portal.

Summary on the finding recommendation:

1. The administrative set up of the district six sub- divisions, six tehsils and five panchayat samities.
2. The literacy rate in the district is good 69.08% compared to the states average literacy rate i.e. 66.11 percent . About 83% of the total population of the district resides in rural areas and agriculture is the main occupation of its people.
3. The district possesses inadequate water and irrigation facilities in general. But as concerned to industrial development, the district has sufficient water for meeting out the need of the existing and emerging industries.
4. The major crop produce of the district are wheat, rice, mustard, barley & gram and hence a few agro based industries are suggested .
5. The district has a good population of livestock, and therefore, a few livestock based industries are being suggested in the district.
6. The major minerals available in the district are sand stone, limestone, bajri and masonry.
7. As regards to existing infrastructure facilities in the district , the main lacunas is the inadequate rial and road linkages /connection of the district with other towns of commercial and trading importance . There is a need to supply more power in the district
8. As regards to existing industrial status the district is one amongst the industrially backward districts of the state. As 31.03.2011 have thirteen units in medium and large scale sector. The total registered units in small scale sector were 3063 as 31.03.2018 with employment for 16028 persons and capital investment of Rs. 41523.89.
9. 50 different type of potential industrial units have been suggested at different locations in the district.
10. Presently there are seven industrial areas in existence in the district located dholpur , bari , as on 31.03.2018 in this dholpur industrial area 99% plots have been allotted , while in growth centre dholpur industrial area 227 plots are allotted out of 261 plots , and in bari industrial area only 66 plots are allotted out of 126 plots. New industrial area village

vishnoda has developed plots available for allotment 42 plots allotted recently out of 411 plots.

11. For development of leather shoe units/artisans 5 plots are allotted out of 16 plots through a special scheme. In this schemes 50% exemption from RIICO development charges.
12. Keeping in view the lack of entrepreneurship skill among the people of district it is proposed to organize one general edp at dholpur .
13. To accelerate the pace of industrial development in the district, industrial promotion campaigns / camps are suggested for being organized at dholpur , bari rajakhera and baseri. In such camps , the active presence of all the involved state level agencies in the field of industrial development would be desirable .
14. in order to development local artisans and to promote local handicraft in the district a training and skill development program is suggested is suggested to increase the expertise of these artisans, which in turn, will certainly raise the quality of their and thus their average earnings will increase .
15. considering fact rural artisans are scattered at different locations of the District and it do not become possible to make them assemble at one place, it is suggested that govt. Should provide a mobile training center of providing training to such scattered artisans of the district.
